(formerly Jantar Resources Ltd.)
Management Discussion and Analysis
For the three and nine months ended July 31, 2010

General

This Management Discussion and Analysis (“MD&A”) was prepared on September 20, 2010 and it describes the operating financial results of the Company for the three and nine months ended July 31, 2010. The MD&A should be read in conjunction with the interim consolidated financial statements and related notes thereto of the Company as at and for the three and nine months ended July 31, 2010 and 2009 and the audited financial statements and related notes thereto of the Company, as at and for the years ended October 31, 2009 and 2008, which were prepared in accordance with Canadian generally accepted accounting principles. The Company is presently a “Venture Issuer”, as defined in NI 51-102.

This MD&A may contain statements that are forward-looking in nature, involving known and unknown risks and uncertainties such as general economic and business conditions, operating costs, changes in foreign currency exchange rates, and other factors. Since forward-looking statements address future events and conditions, by their nature, they involve inherent risks and uncertainties. Therefore, actual results may be materially different from those expressed or implied in such statements.

Additional information relating to the Company is available on the SEDAR website at www.sedar.com.

Description of Business

Ultra Lithium Inc. is an exploration stage company engaged in the acquisition, exploration and development of resource properties. As at July 31, 2010, the Company has interests in the following resource properties:

1. South Big Smokey Valley, Nevada

On February 22, 2010, the Company entered into a mineral property acquisition agreement, through its wholly-owned subsidiary, Ultra Lithium (USA) Inc., to acquire a 100% interest in and up to 364 placer claims (7,280 acres) strategically located in the South Big Smokey Valley, Esmeralda County, Nevada. As consideration, the Company paid US\$150,000 and issued an aggregate of 1,500,000 common shares to the vendor. In addition, the Company issued an aggregate of 300,000 common shares to arm’s length parties as finders’ fees related to this acquisition.

2. Zigzag Property, Ontario

On August 31, 2009, the Company entered into a mineral property acquisition agreement to acquire a 100% undivided right, title and interest in and to seven mineral claims in the Zigzag Lake lithium, tantalum, beryllium and gallium property located in the town ship of Crescent Lake, Ontario. The project consists of 129 claim units for a total surface area of 2,064 hectares. As consideration, the Company shall pay \$112,000, issue 400,000 common shares and incur aggregate exploration expenditures of \$226,800 over a period of three years. As at the date of this MD&A, \$32,000 was paid and 100,000 common shares were issued pursuant to the agreement. The Company agreed to pay finder’s fees of an aggregate of \$14,440 and issue an aggregate of 40,000 common shares of the Company over a period of three years, of which \$6,440 was paid and 20,000 common shares were issued as at the date of this MD&A.

Ultra Lithium Inc.
(formerly Jantar Resources Ltd.)
Management Discussion and Analysis
For the three and nine months ended July 31, 2010

On March 3, 2010, the Company entered into an option agreement with Canadian Orebodies Inc. (“Orebodies”) whereby Orebodies has been granted an option to earn an 80% interest in the Zigzag Lake property by making scheduled cash payments totaling \$100,000, issuing an aggregate of 650,000 common shares of Orebodies and incurring aggregate exploration expenditures of \$350,000 on the property over a three year period. As at July 31, 2010, the Company received a \$10,000 cash payment and 200,000 shares of Orebodies pursuant to the terms of the agreement.

3. Berland Property, Alberta

On August 21, 2009, the Company entered into a mineral acquisition agreement to acquire a 100% interest in seven mineral permit applications consisting of two lithium brine projects located near Berland river within west central Alberta. As consideration, the Company paid \$50,000 and issued 2,000,000 common shares. The project is subject to a 2% net smelter return royalty, of which, 1% may be acquired by the Company for \$1 million.

4. Don Pancho Prospect, Peru

On January 7, 2009, the Company entered into an option agreement to acquire a 100% interest in the Don Pancho prospect in Peru. As consideration, the Company agreed to pay \$375,000, issue 400,000 common shares and incur aggregate exploration expenditures of \$1,500,000 over a period of four years. The Company paid option payments of \$25,000 and incurred \$2,000 in expenditures on the property. During the year ended October 31, 2009, management abandoned its interest in the property resulting in a write off of resource property costs of \$27,000.

The Company incurred a loss of \$307,526 during the nine months ended July 31, 2010 and has accumulated losses of \$2,107,305 as at July 31, 2010. As the Company is still in exploration stage, the loss will likely to continue for the near future.

The Company’s business, results of operations, financial condition, and the trading price of its common shares could be materially adversely affected by risks related to development of mineral deposits, metal prices, title matters, reclamation costs, gold and other base metal prices volatility, competition, additional funding requirements, insurance, currency fluctuations, conflicts of interest, and share trading volatility. Any of these risks could have a material adverse effect on the business, operations or financial condition of the Company.

The Company continues to evaluate projects of merit that would be of benefit to the Company.

Risk Factors

The Company is in the business of acquiring, exploring and, if warranted, developing and exploiting natural resource properties. Due to the nature of the Company’s business and the present stage of exploration of its resource properties (which are primarily early stage exploration properties with no known resources or reserves that have not been explored by modern methods), the following risk factors, among others, will apply:

Ultra Lithium Inc.

(formerly Jantar Resources Ltd.)

Management Discussion and Analysis

For the three and nine months ended July 31, 2010

Mining Industry is Intensely Competitive: The Company's business will be the acquisition, exploration and development of resource properties. The mining industry is intensely competitive and the Company will compete with other companies that have far greater resources.

Resource Exploration and Development is Generally a Speculative Business: Resource exploration and development is a speculative business and involves a high degree of risk, including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but from finding mineral deposits which, though present, are insufficient in size to return a profit from production. The marketability of natural resources that may be acquired or discovered by the Company will be affected by numerous factors beyond the control of the Company. These factors include market fluctuations, the proximity and capacity of natural resource markets, government regulations, including regulations relating to prices, taxes, royalties, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in the Company not receiving an adequate return on invested capital. The great majority of exploration projects do not result in the discovery of commercially mineable deposits of ore.

Fluctuation of Metal Prices: Even if commercial quantities of mineral deposits are discovered by the Company, there is no guarantee that a profitable market will exist for the sale of the metals produced. Factors beyond the control of the Company may affect the marketability of any substances discovered. The prices of various metals have experienced significant movement over short periods of time, and are affected by numerous factors beyond the control of the Company, including international economic and political trends, expectations of inflation, currency exchange fluctuations, interest rates and global or regional consumption patterns, speculative activities and increased production due to improved mining and production methods. The supply of and demand for metals are affected by various factors, including political events, economic conditions and production costs in major producing regions. There can be no assurance that the price of any mineral deposit will be such that any of its resource properties could be mined at a profit.

Permits and Licenses: The operations of the Company will require licenses and permits from various governmental authorities. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration, development and mining operations at its projects.

No Assurance of Profitability: The Company has no history of earnings and, due to the nature of its proposed business, there can be no assurance that the Company will ever be profitable. The Company has not paid dividends on its shares since incorporation and does not anticipate doing so in the foreseeable future. The only present source of funds available to the Company is from the sale of its common shares or, possibly, the sale or optioning of a portion of its interest in its resource properties. Even if the results of exploration are encouraging, the Company may not have sufficient funds to conduct the further exploration that may be necessary to determine whether or not a commercially mineable deposit exists. While the Company may generate additional working capital through further equity offerings or through the sale or possible syndication of its properties, there can be no assurance that any such funds will be available on favourable terms, or at all. At present, it is impossible to determine what amounts of additional funds, if any, may be required. Failure to raise such additional capital could put the continued viability of the Company at risk.

Ultra Lithium Inc.

(formerly Jantar Resources Ltd.)

Management Discussion and Analysis

For the three and nine months ended July 31, 2010

Uninsured or Uninsurable Risks: The Company may become subject to liability for pollution or hazards against which it cannot insure or against which it may elect not to insure where premium costs are disproportionate to the Company's perception of the relevant risks. The payment of such insurance premiums and of such liabilities would reduce the funds available for exploration and production activities.

Government Regulation: Any exploration, development or mining operations carried on by the Company will be subject to government legislation, policies and controls relating to prospecting, development, production, environmental protection, mining taxes and labour standards. In addition, the profitability of any mining prospect is affected by the market for precious and/or base metals which is influenced by many factors including changing production costs, the supply and demand for metals, the rate of inflation, the inventory of metal producing corporations, the political environment and changes in international investment patterns.

Environmental Matters: Existing and possible future environmental legislation, regulations and actions could cause significant expense, capital expenditures, restrictions and delays in the activities of the Company, the extent of which cannot be predicted and which may well be beyond the capacity of the Company to fund. The Company's right to exploit any mining properties will be subject to various reporting requirements and to obtaining certain government approvals and there can be no assurance that such approvals, including environment approvals, will be obtained without inordinate delay or at all.

Insufficient Financial Resources: The Company does not presently have sufficient financial resources to undertake by itself the exploration and development of all of its planned exploration and development programs. The development of the Company's properties will therefore depend upon the Company's ability to obtain financing through the joint venturing of projects, private placement financing, public financing or other means. There can be no assurance that the Company will be successful in obtaining the required financing. Failure to raise the required funds could result in the Company losing, or being required to dispose of, its interest in its properties. In particular, failure by the Company to raise the funding necessary to maintain in good standing its various option agreements could result in the loss of its rights to such properties.

Dependence Upon Others and Key Personnel: The success of the Company's operations will depend upon numerous factors, many of which are beyond the Company's control, including (i) the ability to design and carry out appropriate exploration programs on its resource properties; (ii) the ability to produce minerals from any resource deposits that may be located; (iii) the ability to attract and retain additional key personnel in exploration, marketing, mine development and finance; and (iv) the ability and the operating resources to develop and maintain the properties held by the Company. These and other factors will require the use of outside suppliers as well as the talents and efforts of the Company and its consultants and employees. There can be no assurance of success with any or all of these factors on which the Company's operations will depend, or that the Company will be successful in finding and retaining the necessary employees, personnel and/or consultants in order to be able to successfully carry out such activities. This is especially true as the competition for qualified geological, technical and mining personnel and consultants is particularly intense in the current marketplace.

Ultra Lithium Inc.

(formerly Jantar Resources Ltd.)

Management Discussion and Analysis

For the three and nine months ended July 31, 2010

Price Fluctuations and Share Price Volatility: In recent years, the securities markets in the United States and Canada have experienced a high level of price and volume volatility, and the market price of securities of many companies, particularly those considered development stage companies, have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual and extreme fluctuations in price will not occur.

Surface Rights and Access: Although the Company acquires the rights to some or all of the minerals in the ground subject to the tenures that it acquires, or has a right to acquire, in most cases it does not thereby acquire any rights to, or ownership of, the surface to the areas covered by its mineral tenures. In such cases, applicable mining laws usually provide for rights of access to the surface for the purpose of carrying on mining activities, however, the enforcement of such rights can be costly and time consuming. In areas where there are no existing surface rights holders, this does not usually cause a problem, as there are no impediments to surface access. However, in areas where there are local populations or land owners, it is necessary, as a practical matter, to negotiate surface access. There can be no guarantee that, despite having the right at law to access the surface and carry on mining activities, the Company will be able to negotiate a satisfactory agreement with any such existing landowners/occupiers for such access, and therefore it may be unable to carry out mining activities. In addition, in circumstances where such access is denied, or no agreement can be reached, the Company may need to rely on the assistance of local officials or the courts in such jurisdictions.

Title: Although the Company has taken steps to verify the title to the resource properties in which it has or has a right to acquire an interest in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee title (whether of the Company or of any underlying vendor(s) from whom the Company may be acquiring its interest). Title to resource properties may be subject to unregistered prior agreements or transfers, and may also be affected by undetected defects or the rights of indigenous peoples.

Selected Annual Information

The following selected financial data with respect to the Company's financial condition and results of operations has been derived from the audited financial statements of the Company for the years ended October 31, 2009, 2008 and 2007, which have been prepared in accordance with accounting principles generally accepted in Canada. The selected financial data should be read in conjunction with those financial statements and the notes thereto.

Results of Operations

Three months ended July 31, 2010 and 2009

During the three months ended July 31, 2010, the Company incurred a loss of \$100,614 as compared to a loss of \$130,092 during the same period in the prior fiscal year. The decrease in loss by \$29,478 is primarily attributable to a decrease in stock-based compensation expense of \$61,629 and an increase in foreign exchange gain of \$1,349 offset by an increase in general and administration expenses of \$33,070 and a decrease in interest income of \$430.

The Company recorded stock-based compensation of \$12,042 during the three months ended July 31, 2010 for stock options granted to its directors, officers and consultants to purchase 300,000 shares at \$0.10 per share for a period of ten years expiring January 14, 2010, 250,000 shares at \$0.10 per share for a period of ten years expiring May 3, 2020 and 400,000 shares at \$0.10 per share for a period of ten years expiring June 23, 2020. During the three months ended July 31, 2009, the Company recorded \$73,671 of stock-based compensation for options granted to its directors, officers and consultants to purchase 1,760,000 shares at \$0.10 per share for a period of ten years expiring February 5, 2019 and 400,000 shares at \$0.10 per share for a period of ten years expiring June 3, 2019.

General and administrative expenses excluding stock-based compensation increased by \$33,070 as a result of increases in bank charges and interest of \$498, consulting fees of \$23,843, office, rent and administration of \$7,145, professional fees of \$5,331, transfer agent fees of \$1,023 and travel and promotion of \$5,311. The increase was offset by decreases in amortization of \$31, management fees of \$9,200 and stock exchange and filing fees of \$850.

The increase in consulting fees of \$23,843 was a result of fees paid to a various consultants of the Company. The consultants assisted the Company in finding and evaluating potential projects. During the three months ended April 30, 2009, the Company incurred \$17,750 in consulting fees for project evaluation.

Management fees decreased by \$9,200 as a result of a cancellation of monthly management fees of \$3,900 to a former CEO of the Company. This is offset by new monthly management fees of \$2,500 paid to the

Ultra Lithium Inc.
(formerly Jantar Resources Ltd.)
Management Discussion and Analysis
For the three and nine months ended July 31, 2010

new CEO of the Company.

Nine months ended July 31, 2010 and 2009

During the nine months ended July 31, 2010, the Company incurred a loss of \$307,526 as compared to a loss of \$331,327 during the same period in the prior fiscal year. The decrease in loss by \$23,801 is primarily attributable to a decrease in stock-based compensation expense of \$154,020 and an increase in foreign exchange gain of \$1,232 offset by an increase in general and administration expenses of \$104,215 and decreases in interest income of \$3,273 and mining exploration tax recovery of \$23,963.

The Company recorded stock-based compensation of \$7,838 during the nine months ended July 31, 2010 for stock options granted to its directors, officers and consultants to purchase 300,000 shares at \$0.10 per share for a period of ten years expiring January 14, 2020, 250,000 shares at \$0.10 per share for a period of ten years expiring May 3, 2020 and 400,000 shares at \$0.10 per share for a period of ten years expiring June 23, 2020. During the nine months ended July 31, 2009, the Company recorded \$161,858 of stock-based compensation for options granted to its directors, officers and consultants to purchase 1,760,000 shares at \$0.10 per share for a period of ten years expiring February 5, 2019 and 400,000 shares at \$0.10 per share for a period of ten years expiring June 3, 2019.

General and administrative expenses excluding stock-based compensation increased by \$104,215 as a result of increases in bank charges and interest of \$842, consulting fees of \$86,324, office, rent and administration of \$18,640, professional fees of \$4,674, transfer agent fees of \$1,243 and travel and promotion of \$10,744. The increase was offset by decreases in amortization of \$93, management fees of \$15,800 and stock exchange and filing fees of \$2,359.

The increase in consulting fees of \$86,324 was a result of fees paid to a various consultants of the Company. The consultants assisted the Company in finding and evaluating potential projects. During the nine months ended July 31, 2009, the Company incurred \$65,725 in consulting fees for project evaluation.

Management fees decreased by \$15,800 as a result of a cancellation of monthly management fees of \$3,900 to a former CEO of the Company. This is offset by new monthly management fees of \$2,500 paid to the new CEO of the Company.

October 31, 2008	Nil	(70,166)	-	931,746	Nil	Nil

Since inception on November 27, 2004, the Company has been consistently incurring losses from operations each quarter. As the Company is in an exploration and development stage and has no operating revenues, this trend is likely to continue in the near term.

Liquidity and Capital Resources

The Company currently has no operating revenues and since the date of inception on November 27, 2004, the Company has been incurring losses. The Company has financed its operations and met its capital requirements primarily through the sale of capital stock.

The Company's cash and cash equivalents and short-term investments at July 31, 2010 were held for working capital purposes and were invested primarily in Guaranteed Investment Certificates.

As at July 31, 2010, the Company had a working capital of \$148,403 as compared to a working capital of \$547,792 as at October 31, 2009, representing a decrease in working capital by \$399,389. Net cash on hand decreased by \$2,210 from \$15,097 at October 31, 2009 to \$12,887 at July 31, 2010. The decrease in cash resulted mainly from inflows of cash from the redemption of short-term investments of \$410,000, net proceeds from the issuance of shares of \$133,405 and property option payment of \$10,000 received offset by cash utilized for operations of \$299,295 and for the acquisition and exploration of resources properties of \$256,320.

The Company entered into a property option agreement to acquire a 100% interest in and up to 364 placer claims in Nevada. During the nine months ended July 31, 2010, the Company issued 1,300,000 common shares with a deemed value of \$78,000 and paid \$155,985 (US\$150,000) related to this acquisition. See "*Description of Business - 1. South Big Smokey Valley, Nevada*".

During the nine months ended July 31, 2010, the Company issued 10,000 common shares with a deemed value of \$800 and paid \$2,033 pursuant to its Zigzag property option agreement. During the period, the Company granted Orebodies an option to acquire an 80% interest in this property and received 200,000

Ultra Lithium Inc.

(formerly Jantar Resources Ltd.)

Management Discussion and Analysis

For the three and nine months ended July 31, 2010

shares of Orebodies with a deemed value of \$16,000 and a cash payment of \$10,000 pursuant to its agreement with Orebodies "*Description of Business - 2. Zigzag Property, Ontario*".

During the nine months ended July 31, 2010, the Company raised gross proceeds of \$150,000 from a non-brokered private placement of 3,000,000 units at \$0.05 per unit. Each unit consists of one common share and one common share purchase warrant. Each Warrant entitles the holder, on exercise, to acquire one additional common share of the Company at an exercise price of \$0.10 per share at any time until April 6, 2012. The Company paid a finder's fee of \$15,000 on this private placement.

As of the date of this MD&A, financing for the Company's operations is also potentially available through the exercise of 1,725,000 vested stock options exercisable at a price of \$0.10 per share which expire on May 12, 2018, 1,760,000 vested stock options exercisable at a price of \$0.10 per share which expire on February 5, 2019, 350,000 vested stock options exercisable at a price of \$0.10 per share which expire on June 3, 2019, 37,500 vested stock options exercisable at a price of \$0.10 per share which expire August 14, 2019, 156,250 vested stock options exercisable at a price of \$0.10 per share which expire September 22, 2019, 150,000 vested stock options exercisable at a price of \$0.10 per share which expire January 14, 2020, 93,750 vested stock options exercisable at a price of \$0.10 per share which expire May 3, 2020, 100,000 vested stock options exercisable at a price of \$0.10 per share which expire June 23, 2020, 50,000 vested stock options exercisable at a price of \$0.10 per share which expire September 3, 2020, 3,000,000 share purchase warrants exercisable at a price of \$0.20 per share which expire on July 7, 2011 and 3,000,000 share purchase warrants exercisable at a price of \$0.10 per share which expire on April 6, 2012. However, there can be no assurance that any of these outstanding convertible securities will be exercised, particularly if the trading price of the common shares on the TSX Venture Exchange does not exceed, by a material amount and for a reasonable period, the exercise price of such convertible securities at some time prior to their expiry dates.

The Company believes that it currently has sufficient funds to continue its anticipated ongoing operations for fiscal 2010. However, if the Company's plans change (as, for example, if it determines to carry out additional work, acquire additional properties or accelerate its presently contemplated work programs) or its current assumptions change or prove inaccurate, the Company may be required to seek additional financing. The Company does not have long-term debt.

The Company has not had a history of operations or earnings and its overall success will be affected by its current or future business activities. The continued operations of the Company and the recoverability of expenditures incurred to earn an interest in resource properties are dependent upon the existence of economically recoverable reserves, securing and maintaining title and beneficial interest in the properties, obtaining necessary financing to explore and develop the properties, and upon future profitable production or proceeds from disposition of the resource properties.

Related Party Transactions

During the nine months ended July 31, 2010 and 2009, expenses incurred by the Company's directors and officers and companies controlled by them were as follows.

Ultra Lithium Inc.
(formerly Jantar Resources Ltd.)
Management Discussion and Analysis
For the three and nine months ended July 31, 2010

	2010	2009
Management fees	\$ 25,900	\$ 41,700
Office, rent and administration	43,200	45,000
Consulting fees	10,925	9,625
Legal fees	9,869	8,325
	<u>\$ 89,894</u>	<u>\$ 104,650</u>

During the nine months ended July 31, 2010, the Company recovered \$19,500 (July 31, 2009 – \$Nil) for office, rent and administration from companies having directors and officers in common.

Included in amounts receivable were recoveries of \$840 (October 31, 2009 – \$Nil) for office, rent and administration due from a company having directors and officers in common.

Included in prepaid expenses were rent deposit of \$2,000 (October 31, 2009 - \$2,000) and prepaid rent of \$Nil (October 31, 2009 - \$4,000) to a company having a director and officers in common.

Included in accounts payable and accrued liabilities was a legal fees of \$347 (October 31, 2009 - \$1,432) payable to a company controlled by an officer of the Company.

Included in accounts payable and accrued liabilities is \$7,203 (October 31, 2009 - \$7,203) payable to a director and officer of the Company. These amounts are unsecured, non-interest bearing, and have no specific terms of repayment.

These transactions are in the normal course of business operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

Subsequent Event

Subsequent to July 31, 2010, the Company granted stock options to a director to purchase 200,000 common shares at an exercise price of \$0.10 per share expiring ten years from date of grant.

Changes in Accounting Policies including Initial Adoption

The Company has adopted the following new accounting standards issued by the Canadian Institute of Chartered Accountants (CICA) effective November 1, 2009.

- (a) Goodwill and intangible assets

CICA Handbook Section 3064, *Goodwill and Intangible Assets* (Section 3064) replaces CICA Handbook Section 3062, *Goodwill and Intangible Assets* and establishes standards for the recognition, measurement and disclosure of goodwill and intangible assets. CICA Handbook Section 1000, *Financial Statement Concepts* is amended to clarify criteria for recognition of an asset. CICA Handbook Section 3450, *Research and Development Costs* is replaced by guidance in

Ultra Lithium Inc.

(formerly Jantar Resources Ltd.)

Management Discussion and Analysis

For the three and nine months ended July 31, 2010

Section 3064. EIC 27 *Revenues and Expenditures During the Pre-Operating Period* is no longer applicable for entities that have adopted Section 3064. A number of other EIC abstracts have consequential amendments. CICA Accounting Guideline 11 *Enterprises in the Development Stage* is also amended to delete references to deferred costs and to provide guidance on development costs as intangible assets under CICA 3064. The adoption of this Section had no impact on the Company's consolidated financial statements.

(b) Credit Risk and the Fair Value of Financial Assets and Financial Liabilities

EIC-173, *Credit Risk and the Fair Value of Financial Assets and Financial Liabilities*, provides guidance on how to take into account an entity's own credit risk and the credit risk of the counter party in determining the fair value of financial assets and financial liabilities, including derivative instruments, for presentation and disclosure purposes. The application of this EIC had no effect on the Company's consolidated financial statements.

(c) Mining Exploration Costs

EIC-174, *Mining Exploration Costs*, provides guidance on the capitalization of exploration costs and the impairment review of exploration costs. The application of this EIC did not have an effect on the Company's consolidated financial statements.

Future Accounting Pronouncements

(a) International Financial Reporting Standards (IFRS):

In 2006, the Canadian Accounting Standards Board (AcSB) published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008, the AcSB announced that 2011 is the changeover date for publicly accountable companies to use IFRS, replacing Canadian GAAP. This date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended October 31, 2011.

The Company has completed a preliminary assessment of how each IFRS standard impacts the financial statements. It was initially determined that the area of accounting difference that will likely be impacted based on existing IFRS will be impairment of assets and the initial adoption of IFRS under the provisions of IFRS 1 "First-Time Adoption of IFRS". In addition, the Company anticipates a significant increase in disclosure resulting from the adoption of IFRS and is continuing to assess the level of disclosure required.

(b) Business combinations

CICA Handbook Section 1582, *Business Combinations*, replaces Section 1581, *Business Combinations* and provides the Canadian equivalent to International Financial Reporting

Ultra Lithium Inc.

(formerly Jantar Resources Ltd.)

Management Discussion and Analysis

For the three and nine months ended July 31, 2010

Standards (“IFRS”) 3, *Business Combinations*. This applies to a transaction in which the acquirer obtains control of one or more businesses. Most assets acquired and liabilities assumed, including contingent liabilities that are considered to be improbable, will be measured at fair value. Any interest in the acquiree owned prior to obtaining control will be remeasured at fair value at the acquisition date, eliminating the need for guidance on step acquisitions. Additionally, a bargain purchase will result in recognition of a gain and acquisition costs must be expensed. Earlier application is permitted. The Company does not expect to adopt this standard prior to November 1, 2011, at which time it expects to adopt the equivalent IFRS standard.

(c) Consolidations and Non-Controlling Interests

Section 1601, *Consolidated Financial Statements*, and Section 1602, *Non-Controlling Interests*, replace Section 1600, *Consolidated Financial Statements*. Section 1601 establishes standards for the preparation of consolidated financial statements. Section 1602 establishes standards for accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. It is equivalent to the corresponding provisions of IFRS standard, IAS 27 (Revised), *Consolidated and Separate Financial Statements*. The Sections apply to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011. Earlier adoption is permitted as of the beginning of a fiscal year. The Company does not expect to adopt this standard prior to November 1, 2011, at which time it expects to adopt the equivalent IFRS standard.

Off-Balance-Sheet Arrangements

The Company has not entered into any off-balance-sheet arrangements.

Fair Value of Financial Instruments

The Company’s financial instruments consist of cash and cash equivalents, short-term investments, amounts receivable, marketable securities and accounts payable and accrued liabilities.

Cash and short-term investments are designated as held-for-trading and therefore carried at fair value, with the unrealized gain or loss recorded in interest income. Receivables are classified as loans and receivables, which are measured at amortized cost. Marketable securities are classified as available-for-sale and carried at fair value. Accounts payable and accrued liabilities are classified as other financial liabilities, which are measured at amortized cost.

The carrying values of cash and cash equivalents, amounts receivable and accounts payable and accrued liabilities approximate their fair values due to the short-term nature of these instruments. The fair values of marketable securities are based on active market obtained from the closing stock price at period end.

In 2009, CICA Section 3862, *Financial Instruments - Disclosures*, was amended to require disclosures about the inputs to fair value measurements, including their classification within a hierarchy that prioritizes the inputs to fair value measurements. The three levels of fair value hierarchy are:

Ultra Lithium Inc.
(formerly Jantar Resources Ltd.)
Management Discussion and Analysis
For the three and nine months ended July 31, 2010

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 – Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The following illustrates the classification of the Company’s financial instruments within the fair value hierarchy as at July 31, 2010:

Assets	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 12,887	\$ -	\$ -	\$ 12,887
Short-term investments	140,000	-	-	140,000
Marketable securities	13,000	-	-	13,000
	\$ 165,887	\$ -	\$ -	\$ 165,887

For the nine months ended July 31, 2010, a mark to market loss of \$3,000 (2009 - \$Nil) for marketable securities designated as available-for-sale has been recognized in comprehensive loss. There were no disposals or impairment provisions during the period.

The Company’s risk exposure is summarized as follows:

(a) Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company is subject to credit risk on the cash balances at the bank, its short-term bank guaranteed investment certificates and amounts receivable. The investments are with Schedule 1 banks or equivalent, with the majority of its cash held in Canadian based banking institutions, authorized under the Bank Act to accept deposits, which may be eligible for deposit insurance provided by the Canadian Deposit Insurance Corporation. The amounts receivable consist of goods and services tax recoverable of \$6,464, accounts receivable of \$840 and accrued interest receivable of \$42 which are not considered past due.

(b) Liquidity risk

The Company’s approach to managing liquidity is to ensure that it will have sufficient liquidity to settle obligations and liabilities when due. As at July 31, 2010, the Company had in cash and cash equivalents a balance of \$12,887 and short-term investments of \$140,000 to settle current liabilities of \$29,753 which mainly consist of accounts payable that are considered short term and settled within 30 days. The Company has sufficient capital to meet its requirements for fiscal 2011.

Management Discussion and Analysis

For the three and nine months ended July 31, 2010

(c) Market risk

The only significant market risk to which the Company is exposed is interest rate risk. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company's cash and cash equivalents and short-term investments attract interest at floating rates and have maturities of 90 days or less. The interest is typical of Canadian banking rates, which are at present low, however the conservative investment strategy mitigates the risk of deterioration to the investment. A change of 100 basis points in the interest rates would not be material to the financial statements.

Disclosure and Internal Financial Reporting Control and Procedures

Disclosure controls and procedures ('DC&P') are intended to provide reasonable assurance that information required to be disclosed is recorded, processed, summarized and reported within the time periods specified by securities regulations and that information required to be disclosed is accumulated and communicated to management. Internal controls over financial reporting ('ICFR') are intended to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Canadian generally accepted accounting principles.

TSX Venture listed companies are not required to provide representations in their annual and interim filings relating to the establishment and maintenance of DC&P and ICFR, as defined in National Instrument NI 52-109. In particular, the CEO and CFO certifying officers do not make any representations relating to the establishment and maintenance of (a) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation, and (b) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP. The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in their certificates regarding absence of misrepresentations and fair disclosure of financial information. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Outstanding Share Data

(1) Authorized and Issued Capital Stock

- a) Authorized - Unlimited common shares without par value.

Ultra Lithium Inc.
