### **JANTAR RESOURCES OPTIONS DON PANCHO PROJECT FROM DOUBLE JACK MINES**

**January 13, 2009**

**TSX-V: JR**

---

Vancouver, B.C., January 13, 2009 – Jantar Resources Ltd. (TSX-V: JR) (“Jantar” or “the Company”) is pleased to announce that it has entered into an option agreement with Double Jack Mines Ltd. (“Double Jack”), a privately held Alberta corporation, and its wholly-owned Peruvian subsidiary Hatum Minas S.A.C., pursuant to which Jantar may earn a 100-per-cent interest in Double Jack's Don Pancho Silver-Lead-Zinc project in Peru.

To earn a 100-per-cent interest in the property, Jantar must deliver cash payments totaling \$375,000, issue 400,000 common shares and incur exploration expenditures in the aggregate amount of \$1.5 million, all over a period of four years. Double Jack will retain a 2% Net Smelter Royalty, of which 1% of the NSR may be acquired by Jantar by issuing 200,000 common shares of the Company to Double Jack.

The Don Pancho project, covering an area of 600 hectares, is located 9 kilometers west of the historic Santander Silver-Lead-Zinc Mine currently being explored by Trevali Resources (CNQ: TV), roughly 100 km. east-northeast of Lima in Peru's prolific Cerro de Pasco mineral district. Recent drilling by Trevali has returned significant metal mineralization. The Santander Mine Property and the Don Pancho Property have similar geology and mineralization styles and management of Jantar believes that the Don Pancho property has the potential to host an economically viable Silver-Lead-Zinc deposit.

Sampling shows an extensive low grade silver-lead-zinc envelope with numerous high grade structures returning values from zero up to 238 grams/tonne Silver, 4.15% Zinc and 9.49% Lead. The breccia zone also contains highly elevated manganese values with values from zero up to 43.97%.
